Deloitte Australia · Talent Acquisition

ETP Business Finance Offering — Finance Transformation, Technology & Transformation

Application: Manager | Finance Transformation (Requisition 41731)

Internal application for an international transfer from Deloitte Germany

Dear Finance Transformation team,

Ten years ago I left Australia with an expiring Work and Holiday visa and a fairly specific promise to myself: come back one day — but next time with something worth bringing. **This application is me keeping it.**

Financial services is going through more change at once than at almost any point I can remember. Regulation keeps tightening, demographics are reshaping both the workforce and the customer base, and above all **technology and AI are rewriting how finance functions are actually run** — not making the old model faster, but replacing it. It is a rare wave, and **I am swimming at the front of it**. In practice that means I no longer hand a finance leader a deck about their future steering model: I hand them a **working tool, built with AI on their own data in a matter of days**, where they move the parameters themselves and watch the P&L react in front of them. The conversation is a different one when the numbers are live in the room. I am a **Manager in Banking & Capital Markets Transformation at Deloitte Germany**, and I would like to ride that wave with your practice.

Underneath it sit three things. The first is **practical grounding in the finance function itself**. I trained as a **certified bank clerk (Bankkaufmann)**, advised private and corporate clients on financing and investments, and worked in accounting through year-end close before moving into consulting via a **CEMS Master in International Management**. I know how finance and accounting processes behave in daily operation, not only in a target picture — which is why my recommendations survive contact with the people who run them.

The second is **consulting delivery**. I have led integrated finance and performance transformation programs end to end — **operating model design, process improvement, data foundations and technology enablement** — through multiple go-lives and migrations, and reported the derivations directly to the board. I have worked on **several large post-merger integrations**, most recently as sub-project lead for compensation harmonisation in a major insurance merger, where the task was to make an unpopular change land by showing precisely what it meant for each person affected. Planning, forecasting and scenario simulation, profitability and cost management, and management reporting are the substance of that work. Alongside it I lead teams, and the part I enjoy most is coaching people into ownership earlier than they expect.

The third is **tooling, and increasingly AI**. I have made a habit of moving into whatever is next, and right now that is AI hands-on: my current engagement is the **implementation of AI-enabled sales processes at a major insurer** — real operations, not a pilot deck. Before that I established a **new AI use-case approach** in my practice — functional prototypes built on the client's own data instead of slide decks — and grew a portfolio of tools around it — an AI sales workstation for banks and insurers, AI-assisted control and credit analysis — and from late September I am presenting a firm-wide webinar series on the AI use-case model behind it. What makes this work is that I sit on **both sides at once**: grounded in the business, where I own the case and the finance logic, and fluent in how software actually gets built. That is the most useful place to stand in a transformation — close enough to the business to know what is genuinely needed, and close enough to delivery to build it.

What I am looking for now is to **take that practical, consulting and tooling experience international**: to learn how finance transformation is done in the Australian market, and equally to contribute what I have built in Germany to your practice. That exchange, in both directions, is the real reason for this application — and I would welcome the chance to discuss where I could be most useful.

Kind regards,

Eike Brenneisen

Manager · Banking & Capital Markets Transformation · Deloitte Germany

13 yrs

In financial services — banking, insurance, asset management

AI hands-on

New AI use-case approach established; 15+ tools built, two in production

Business + IT

Expertise end to end, grounded in practice as a trained banker

2016/17

A year lived in Australia — back now for the exchange, both ways

PROFILE

Manager in Banking & Capital Markets Transformation at Deloitte Germany, in financial services since 2013. I lead finance, performance and cost transformation programs end to end — target operating model, process redesign, data foundation, implementation and go-live — with board-level exposure. My edge: I build the solution myself with AI, having established a new AI use-case approach in which working prototypes replace slide decks. I am business and build in equal measure: I know what the client needs, and I can build it.

SELECTED ENGAGEMENTS

- AI Implementation Lead — Sales Process Automation 2026 – present

Major German insurance group · project lead

 - Leading the hands-on implementation of AI-enabled sales processes — from use-case identification and process redesign to solutions running in live operations.
 - Setting the practical standard for AI in the business: where automation genuinely removes effort, what stays with a human, and how the benefit is evidenced rather than asserted.
- Sub-Project Lead — Compensation Harmonisation (PMI) 2025 – 2026

Major German insurance merger · sub-project lead

 - Led the harmonisation of two incompatible compensation models after a major insurance merger — the largest variable cost block in the merged entity.
 - Designed and ran the end-to-end simulation across 1,000+ sales partners, giving the board a fact base to set target parameters.
 - Conceived an interactive migration tool showing each partner their earnings under the new model — adopted by the client as a productised deliverable.
- Program Lead — Performance Management & Sales Steering 2022 – 2024

Major German insurance group · sub-project lead · multi-year program

 - Directed strategic program management for a multi-year transformation of the sales and steering organisation — operating model, processes, data and systems in one program.
 - Owned the planning and simulation model behind the target steering logic; presented derivations directly to the board.
 - Delivered multiple go-lives and data migrations to plan, through cut-over and hypercare.

FINANCE TRANSFORMATION

- Target operating model design
- Planning, forecasting & simulation
- Profitability & cost management
- Management & board reporting
- Process improvement & automation
- Post-merger integration (PMI)

AI & AUTOMATION

- AI use-case identification
- AI-assisted development
- Prototype to production
- Robotic process automation (RPA)

TECHNOLOGY

- Claude Code
- SAP Analytics Cloud
- Power BI
- Dynamics 365 CRM
- Power Automate / Apps
- MySQL | React / Vite
- ServiceNow · SharePoint · Adobe Creative Cloud

INDUSTRIES

- Insurance · Banking & capital markets
- Asset management · Real estate

| German | Native |
| English | Fluent (business) |
| Spanish | Basic |

ARTIFICIAL INTELLIGENCE & DIGITAL INNOVATION

- **Established a new AI use-case approach** as a delivery standard: functional prototypes built with AI on the client's own data, in days — sold at a fixed price and scaled into implementation.
- Designed and built the **AI sales workstation** for banks and insurers and a portfolio of **15+ productised solutions** — AI-assisted control and credit analysis, AI collections & recovery, a compensation simulation engine.
- **Presenting a webinar series from 24 September 2026** on the AI use-case model I built — taking the approach across the firm.
- Built two internal platforms for Deloitte Germany **on my own initiative**: **DEX**, the firm's event experience platform, now rolling out firm-wide, and a freelancer risk-scoring solution.

CAREER HISTORY

Manager — Banking & Capital Markets Transformation 2022 – present
Deloitte Consulting · Core Business Operations · Cologne · with Deloitte since 2021

- **Promoted to Manager in 2026** after leading sub-projects with full responsibility for resourcing, quality, commercials and coaching on two consecutive engagements.
- Lead **large-scale transformation programs** for insurers, banks and asset managers, from operating model design to go-live; coach and counsel consultants and analysts.
- Earlier (2022): ran a **full gap analysis across all business areas** of a universal bank single-handedly, through to remediation plan and board reporting.

Early Career — Consulting and Industry Roles Alongside Studies 2018 – 2021

Monitor Deloitte · HSBC · Ströer Dialog Group · Immofinanz Deutschland

- **Monitor Deloitte, HSBC Business Transformation, Ströer Dialog Group and Immofinanz**: strategy and transformation analysis, sales steering, and transaction accounting through year-end close.

Year in Australia — Work and Holiday 2016 – 2017

Australia · living and working across the country — the reason I have wanted to return in a professional context ever since

Financial Advisor — Private and Corporate Clients 2013 – 2016

Oldenburgische Landesbank AG · bank apprenticeship and full-time advisory role

- Advised clients end to end on **securities, financial planning and lending** — the reason I read a client's P&L the way their own people do.

EDUCATION

M.Sc. International Management — CEMS MIM (double degree)

University of Cologne · CEMS Global Alliance · 2020 – 2022

Top 15% of the cohort · Majors: Corporate Development and Business Model Design

B.Sc. Business Administration

University of Cologne · 2017 – 2020

Top 15% of the cohort (German grade 1.6 ≈ Distinction average) · Majors: International Strategic Management, Financial Management

Certified Bank Clerk (Bankkaufmann, IHK) — highest grade band, "very good"

Oldenburgische Landesbank AG · 2013 – 2016

BUSINESS-LED SOFTWARE E2E

- Requirements & business case ownership
- Data modelling and calculation logic
- Build, interface design and rollout
- Vendor and IT delivery steering

DELIVERY & LEADERSHIP

- Program & project management
- Go-live & migration management
- C-level stakeholder management
- Team leadership & coaching

SELECTED AI BUILDS

- Financial services AI use-case platform
- AI sales workstation
- AI credit analysis · collections & recovery
- Internal control system analysis
- Compensation simulation engine

SELECTED CLIENTS

- ERGO Group · Barmenia Gothaer
- Allianz Deutschland · Commerz Real
- HSBC Trinkaus & Burkhardt · Oldenburgische Landesbank

BEYOND THE CV

- 51 countries travelled; trekked to 5,000 m in the Himalayas
- Coordinate Deloitte Cologne's corporate running events
- Planted a forest of 100,000 trees as a personal carbon offset
