Deloitte Australia · Talent Acquisition

ETP Business Finance Offering, Finance Transformation · Technology & Transformation

Application: Manager | Finance Transformation (Requisition 41731)

Internal application for an international transfer from Deloitte Germany

Dear Finance Transformation team,

Ten years ago I left Australia with an expiring Work and Holiday visa and a fairly specific promise to myself: come back one day, but next time with something worth bringing. This application is me keeping it.

Financial services is changing faster than at any point in my career. Regulation keeps tightening, demographics are reshaping workforce and customers, and above all technology and AI are rewriting how finance functions are run. They are not making the old model faster; they are replacing it. I have worked with AI in my delivery from the moment it became practical, and because I understand both the business and how the technology is built, it now runs through everything I do: I no longer hand a finance leader a deck about their future steering model, I hand them a working tool, built with AI on their own data in days, where they move the parameters themselves and watch the P&L react. The conversation is a different one when the numbers are live in the room. My manager case grew out of exactly that way of working. I would like to bring that experience to your practice, and to learn from yours in return.

Underneath it sit three things. The first is practical grounding in the finance function itself. I trained as a certified bank clerk, advised private and corporate clients on financing and investments, and worked in accounting through year-end close before moving into consulting via a CEMS Master in International Management, a programme that is also offered in Australia through the University of Sydney. I know how finance and accounting processes behave in daily operation, not only in a target picture, which is why my recommendations hold up with the people who run them.

The second is consulting delivery. I have led integrated finance and performance transformation programs end to end, from operating model design, process improvement and data foundations to technology enablement, through multiple go-lives and migrations, reporting directly to the board. I have worked on several large post-merger integrations, most recently as sub-project lead for compensation harmonisation in a major insurance merger, where the task was to make an unpopular change land by showing precisely what it meant for each person affected. Planning, forecasting, profitability and cost management, and management reporting are the substance of that work. Alongside it I lead teams, and the part I enjoy most is coaching people into ownership earlier than they expect.

The third is tooling, and increasingly AI, hands-on: my current engagement is the implementation of AI-enabled sales processes at a major insurer, real operations rather than a pilot deck. Before that I established a new AI use-case approach in my practice, functional prototypes on the client's own data instead of slide decks, which became my manager case this year, Breaking Complexity, and from late September a firm-wide webinar series. What makes this work is that I sit on both sides at once, grounded in the business and fluent in how software gets built.

What I am looking for now is to take that practical, consulting and tooling experience international, and Australia is a deliberate choice rather than a convenient one. I know the country from the year I lived and worked there, and I have wanted to come back in a professional role ever since. I want to learn how finance transformation is done in the Australian market, where the regulatory agenda, the client landscape and the pace of AI adoption differ from Germany, and to bring those lessons back into my own work. Equally, I want to contribute what I have built here: a delivery model that puts working tools in front of decision-makers, a portfolio of prototypes that can be adapted to Australian clients, and the habit of connecting business and technology in one person. That exchange, in both directions, is the real reason for this application. I am ready to relocate long term and would welcome the chance to discuss it with you.

Kind regards,

Eike Brenneisen

Manager, Banking & Capital Markets Transformation · Deloitte Germany

13 yrs

In financial services: banking, insurance, asset management

AI hands-on

15+ AI tools delivered, two of them in client production

Business + IT

Expertise end to end, grounded in practice as a trained banker

Back to Australia

A year there in 2016/17; back for a two-way professional exchange

PROFILE

Manager in Banking & Capital Markets Transformation at Deloitte Germany, in **financial services since 2013**. I lead **finance, performance and cost transformation programs** end to end, from target operating model, process redesign and data foundation to implementation and go-live, with **board-level exposure**. My edge: I **lead delivery with AI-built working prototypes** instead of slide decks, and I prototype myself where it de-risks a decision. **Business and build in equal measure**: I know what the client needs and how to get it built.

SELECTED ENGAGEMENTS

AI Implementation Lead, Sales Process Automation 2026 – present
Major German insurance group · project lead

- Leading the hands-on implementation of **AI-enabled sales processes**, from use-case identification to solutions running in live operations.
- Setting the practical standard for AI in the business: **where automation genuinely removes effort**, what stays with a human, and how the benefit is evidenced.

Sub-Project Lead, Compensation Harmonisation (PMI) 2025 – 2026
Major German insurance merger · sub-project lead

- Led the **harmonisation of two incompatible compensation models** after a major insurance merger, the largest variable cost block in the merged entity.
- Designed and ran the **end-to-end simulation** across **1,000+ sales partners**, giving the board a fact base to set target parameters.
- Conceived an **interactive migration tool** showing each partner their earnings under the new model, **adopted by the client as a productised deliverable**.

Program Lead, Performance Management & Sales Steering 2022 – 2024
Major German insurance group · sub-project lead · multi-year program

- Directed **strategic program management** for a multi-year transformation of the sales and steering organisation: operating model, processes, data and systems.
- Owned the **planning and simulation model** behind the target steering logic; **presented derivations directly to the board**.
- Delivered **multiple go-lives and data migrations** to plan, through cut-over and hypercare.

FINANCE TRANSFORMATION

- Target operating model design
- Planning & forecasting
- Profitability & cost management
- Management & board reporting
- Process improvement
- Post-merger integration (PMI)

AI & AUTOMATION

- AI use-case identification
- AI-assisted development
- Prototype to production
- Robotic process automation (RPA)

TECHNOLOGY

- Claude Code

- Spanish Basic

AI TOOL GALLERY

Scan to explore my AI-built tools

kiarbeitsplatz.pages.dev/galerie

- **Established a new AI use-case approach** as a delivery standard: functional prototypes built with AI on the client's own data, in days, sold at a fixed price and scaled into implementation. Subject of my 2026 manager case, **Breaking Complexity**.
- Conceived and led the build of the **AI sales workstation** for banks and insurers and a portfolio of **15+ productised solutions**, from AI-assisted control and credit analysis to a compensation simulation engine.
- **Presenting a webinar series from 24 September 2026** on the AI use-case model I built, taking the approach across the firm.
- Initiated and delivered two internal platforms for Deloitte Germany **on my own initiative**: **DEX**, the firm's event experience platform, and a freelancer risk-scoring solution.

CAREER HISTORY

Deloitte Consulting, Banking & Capital Markets Transformation 2022 – present

Manager since 2026 · Senior Consultant 2023 – 2026 · Consultant 2022 – 2023 · Core Business Operations, Cologne

- **Promoted to Manager in 2026** after leading sub-projects with full responsibility for resourcing, quality, commercials and coaching.
- Lead **large-scale transformation programs** for insurers, banks and asset managers, from operating model to go-live; coach and counsel consultants.
- Earlier (2022): ran a **full gap analysis across all business areas** of a universal bank single-handedly, through to remediation plan and board reporting.

Early Career, Roles Alongside Studies 2018 – 2021

Monitor Deloitte · HSBC · Ströer Dialog Group · Immofinanz Deutschland

- **Monitor Deloitte, HSBC, Ströer Dialog Group and Immofinanz**: strategy and transformation analysis, sales steering, accounting through year-end close.

Year in Australia, Work and Holiday 2016 – 2017

Australia · the reason I have wanted to return in a professional context ever since

Financial Advisor, Private and Corporate Clients 2013 – 2016

Oldenburgische Landesbank AG · bank apprenticeship and full-time advisory role

- Advised clients end to end on **securities, financial planning and lending**: the reason I read a client's P&L the way their own people do.
